

Declaration of HW changes in Elektrobit ISAP

To:	FCC Commission
Date:	17.10.2008
Subject:	Declaration about HW changes
Device name:	Integrated Service Access Point (ISAP)
FCC ID:	V27-DT40ISAP

We, Elektrobit Wireless Communications Ltd., declare that

1. **Integrated Service Access Point** (FCC ID: V27-DT40ISAP) hardware change from HW1 to HW2 was limited to the following only:
 - a. Antenna bandpass filter 2-6GHz changes: improved flatness in pass-band, improved harmonics rejection in the higher stop-band
 - b. Silicon revision changed at the MiniPCI RF-card: Atheros official release of the silicon was released after approval of HW1. Therefore HW1 used still non-official engineering samples. In HW2 the new released revision is used.
2. Changes for new allowed operating channels do not need any changes in ISAP hardware nor on already existing operating channel parameters.

Espoo, 17.10.2008

Antti Sivula
Senior Vice President
Elektrobit Wireless Communications Ltd.
